

Θέτουμε $h(x) = \frac{\sqrt{f(x)}}{\sqrt{f(x)}+1}$ οπότε προφανώς $\lim_{x \rightarrow 1} h(x) = 1$ (1)

Παρατηρούμε ότι $h(x) < 1$

Άρα

$$h(x) = \frac{\sqrt{f(x)}}{\sqrt{f(x)}+1} \Rightarrow h(x)(\sqrt{f(x)}+1) = \sqrt{f(x)} \Rightarrow h(x)\sqrt{f(x)} + h(x) = \sqrt{f(x)} \Rightarrow$$

$$h(x)\sqrt{f(x)} - \sqrt{f(x)} = -h(x) \Rightarrow \sqrt{f(x)}[h(x)-1] = -h(x) \Rightarrow \sqrt{f(x)} = \frac{-h(x)}{h(x)-1}$$

$$\Rightarrow \sqrt{f(x)}^2 = \frac{h^2(x)}{[h(x)-1]^2} \Rightarrow f(x) = \frac{h^2(x)}{[h(x)-1]^2} \Rightarrow \lim_{x \rightarrow 1} f(x) = \lim_{x \rightarrow 1} \frac{h^2(x)}{[h(x)-1]^2} \Rightarrow$$

$$\Rightarrow \lim_{x \rightarrow 1} f(x) = \lim_{x \rightarrow 1} h^2(x) \cdot \lim_{x \rightarrow 1} \frac{1}{[h(x)-1]^2} \Rightarrow \lim_{x \rightarrow 1} f(x) = 1 \cdot (+\infty) = \lim_{x \rightarrow 1} f(x) = +\infty$$
